Vegetation Mortality

Due to time constraints during the emergency assessment by the Burned Area Emergency Response (BAER) team, the vegetation mortality map developed by the team is a preliminary product and has not been verified with intensive ground truthing. It is not intended to be interpreted as an accurate assessment of actual vegetation mortality without further field data collection.

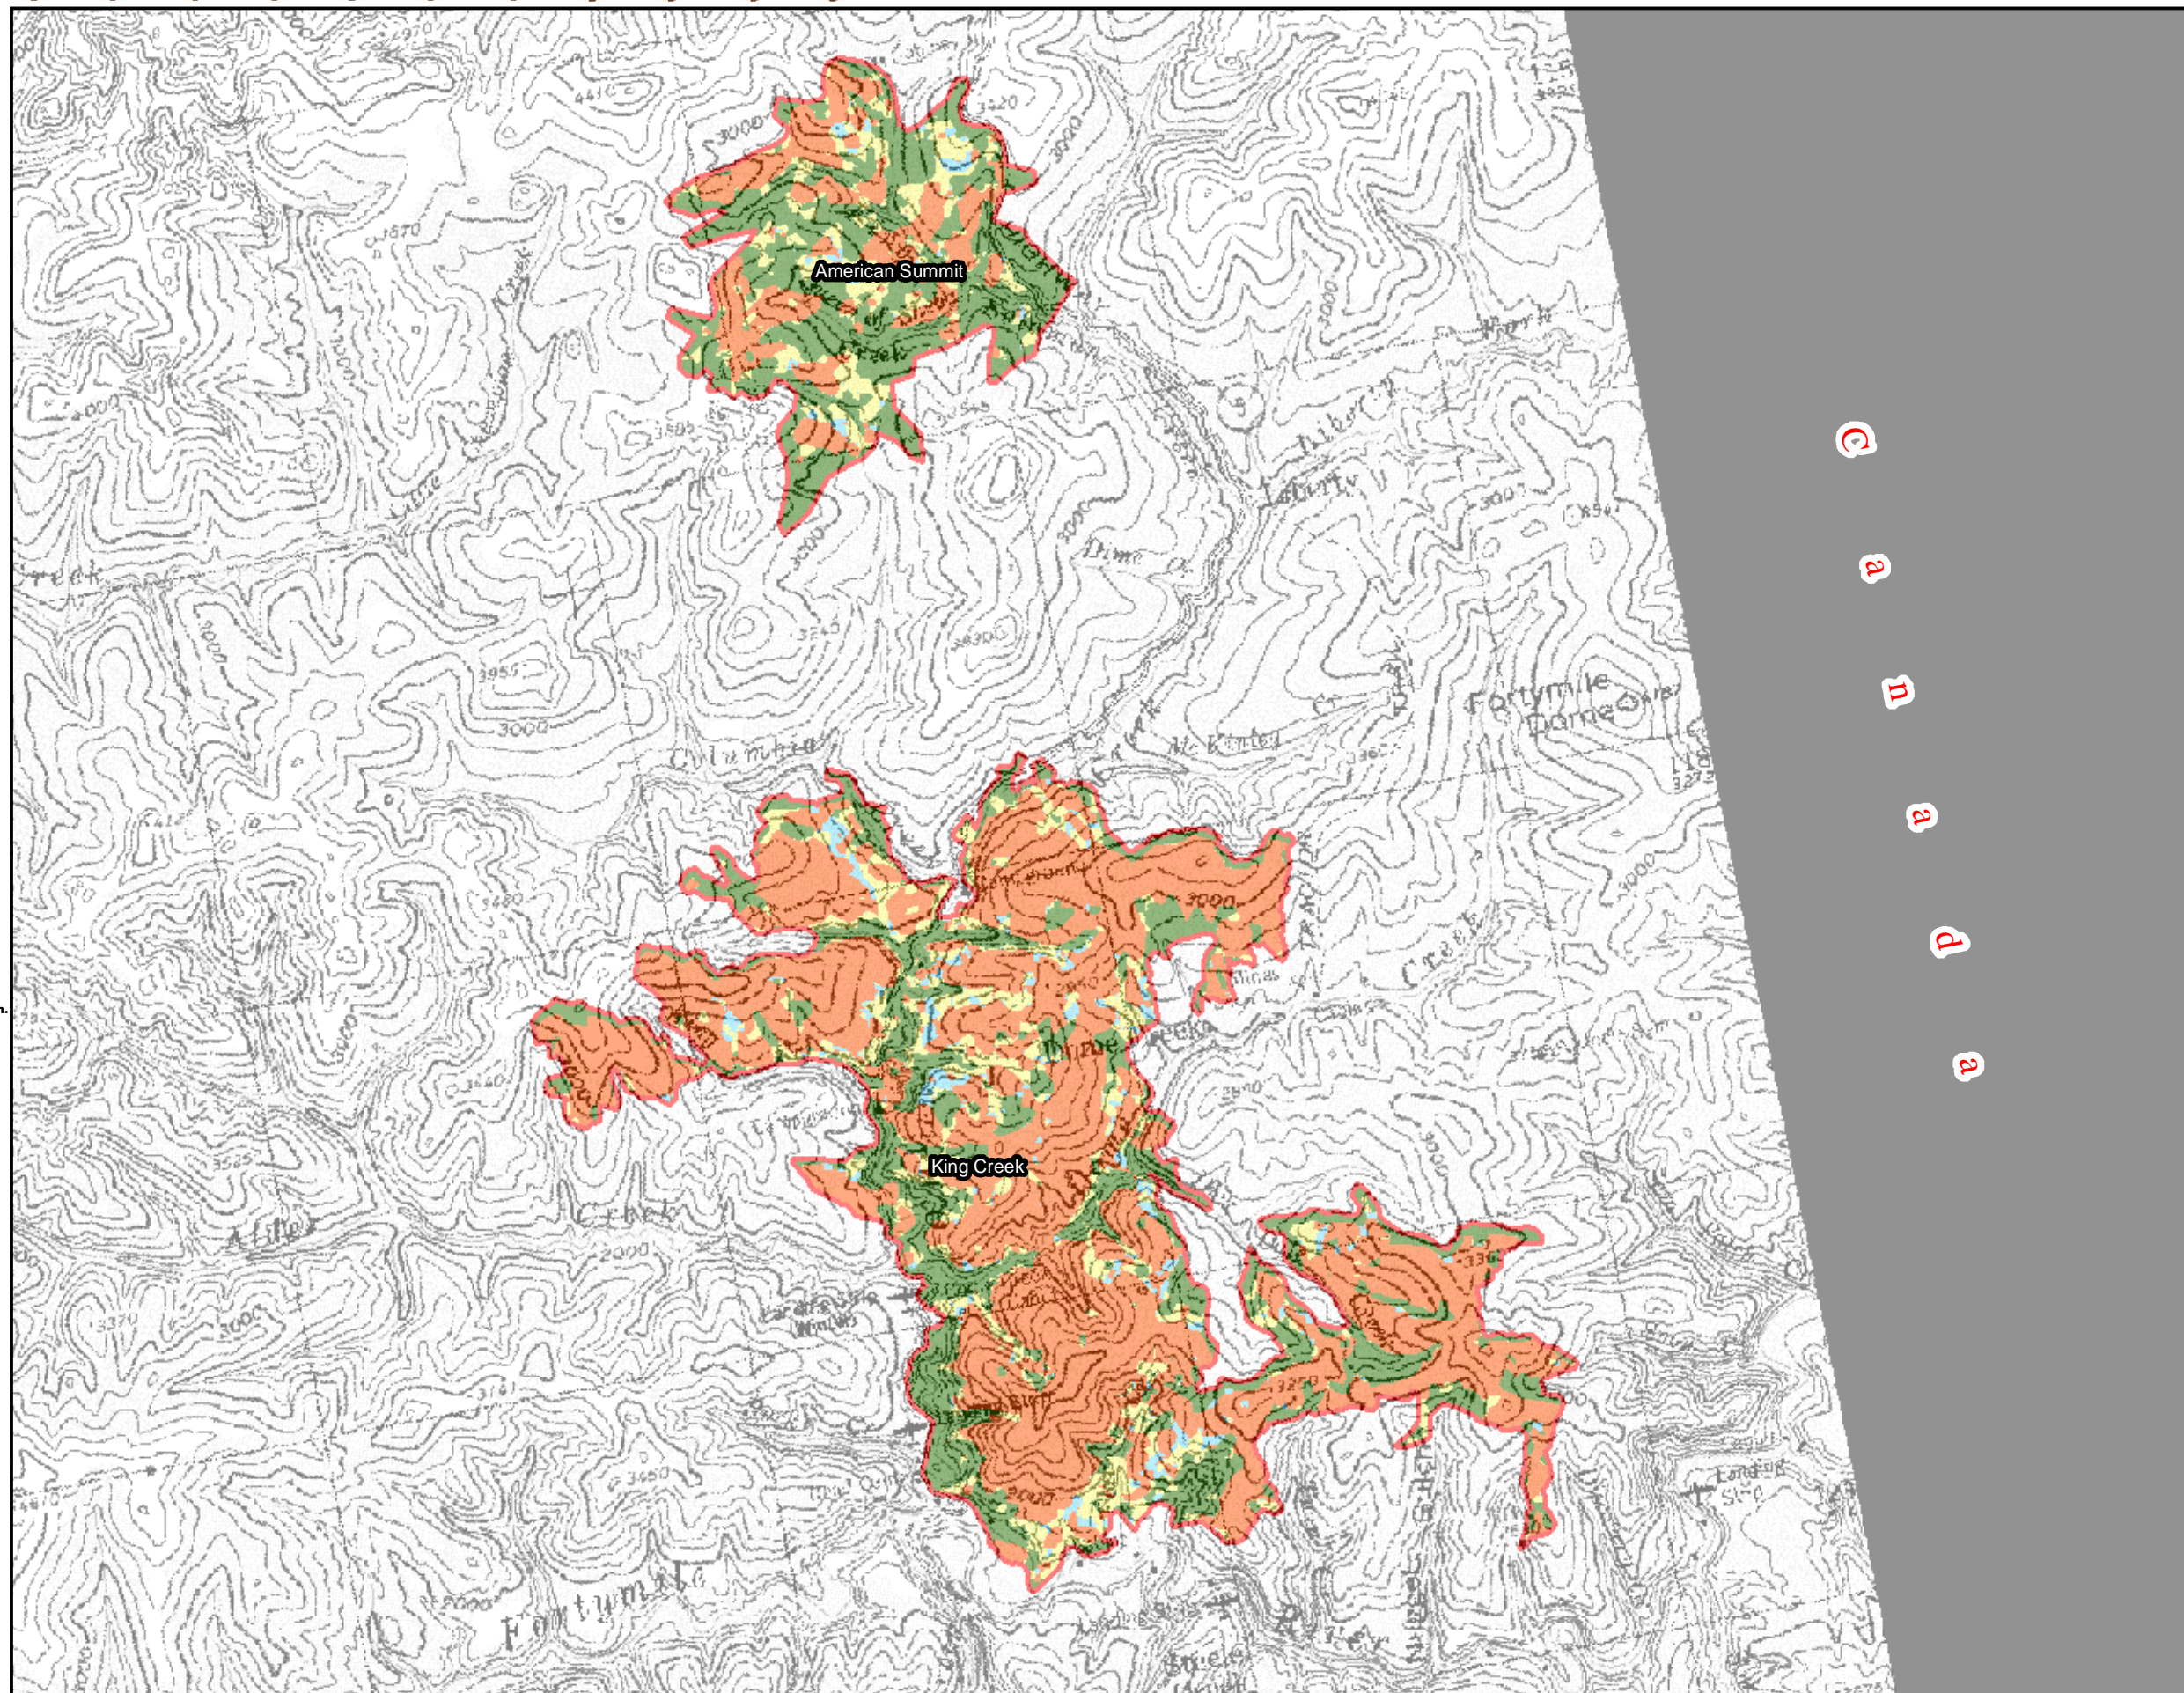

The data represented in this map were gathered from multiple sources, which may vary in accuracy, scale and date. This map is for display purpose only.
